Llewelyn-Davies Sahni, Inc. (LDS) is an award winning Houston-based firm with extensive planning, urban design, architecture and development advisory experience.

The firm has been in business for 31 years in Houston and 40 years in the United States, providing services throughout the US and overseas.

LDS brings together teams of planning, design and development professionals to focus on a wide-range of issues related to all aspects of growth and change in individual developments for small, medium and large-scale projects. The firm has acted as both the prime consultant, leading and managing multi-disciplinary studies, and as a specialist subconsultant to other companies. Clients have included international agencies, national, regional, and local governments, and some of the most prestigious airport designers in the world.

The planning and design of airports permit an architectural exploration of form rarely possible in other building types, allowing the architect to fully exploit strong design themes. However, the creation of a thriving airport does not cease at the physical boundaries. One must account and prepare for significant environmental, societal and area-wide impact. The success of a facility ultimately depends on innovative design and sound urban planning.

**Airport
planning and
image plans**

LDS developed the Environs Image Plans for both Bush Intercontinental and William P. Hobby Airports, and then carried the same concept to the San Antonio International and Stinson Municipal Airports. This work was related to ground and airfront of the airports and their areas of influence.

Through our affiliate firm with locations worldwide, we offer experience at such international facilities as:

- British Airways Centre for Crew Operations, London
- Hong Kong International Airport Simulator Building
- Aircraft Maintenance Facility, Hong Kong
- Cathay Pacific Airways, Ltd., Ticketing Office, Hong Kong
- Cathay Pacific Airways New Headquarters, Hong Kong
- Shenzhen Airport 2nd Terminal, Shenzhen
- Hong Kong Aircraft Engineering Company Master Plan
- Xian Xianyang International Airport Design Competition
- Air Cargo Terminals, Ltd., Hong Kong
- Lufthansa Airlines Offices, Hong Kong International Airport
- Heathrow Airport Terminal 3, Arrivals Hall, London
