Healthcare

Llewelyn-Davies Sahni, Inc. (LDS) is an award winning Houston-based firm with extensive planning, urban design, architecture, interior architecture and development advisory experience.

The firm has been in business for 31 years in Houston and 40 years in the United States, providing services throughout the US and overseas.

The healthcare practice at LDS offers a full range of planning and design services in the United States and abroad. We bring to each new project broad and varied experience spanning over four decades. Our clients include more than 100 healthcare institutions, medical schools and national, regional and local governments throughout the world. Yet, no project is considered too small for our attention.

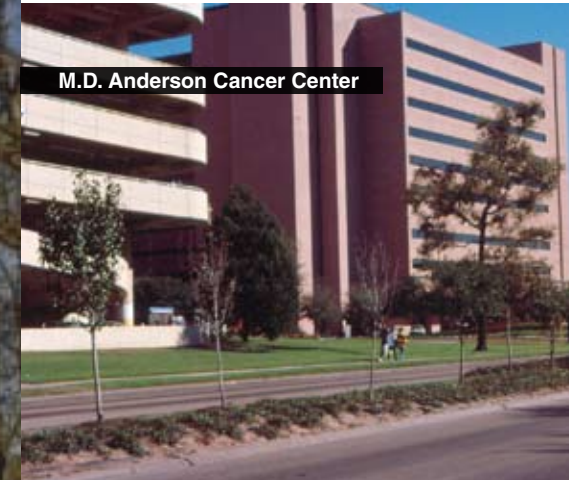

We have the ability to bring a multi-disciplined team of planners, architects, management consultants and financial analysts together. In cooperation with our clients we search for appropriate solutions to the problems we face. This interaction fosters work that is both practical and innovative.

VA Houston Ambulatory Surgery

Ben Taub Hospital

M.D. Anderson Cancer Center

Health-related institutions face the dilemma of how to achieve their objectives within the context of financial, physical and manpower limitations.

Seven Acres Geriatric Center

We outline development options and identify solutions, which maximize the value of available resources.

Our services to healthcare clients typically fall under the following categories:

- Institutional Planning
- Design and Construction Administration
- Hospital Equipment Planning
- Design Management
- Architectural & Functional Programming
- ADA Code Compliance Evaluation
- LEED Evaluation

Reconstructive Orthopedic Center

UT Health Science Center

Houston Eye Surgical Center
